Development Skills

HTML

Experienced in taking advantage of HTML5 features, structuring mobile-ready websites and single-page apps using templating languages such as Handlebars, Dust or Underscore.

CSS - Sass - Less

Strong knowledge about the most common grid layout systems such as Bootstrap and Foundation. Experienced in building responsive layouts using CSS.

JavaScript

Experienced in building modular large-scale e-commerce platforms and web applications using NodeJS on the server and writing clientside JavaScript functionality.

Task automation/bundling using Grunt/Gulp/Webpack and management of package dependencies using NPM or Bower.

Working with JavaScript frameworks like Angular, React or VueJS and ES2015 JavaScript/JSX using the Babel transpiler for browser backwards-compatibility.

User Experience / User Interface Skills

Experience in doing UX/UI tutoring sessions enabling companies to focus on the user's needs to allow them to have a quick and painless process of using a website or web application.

Strong knowledge about building user-centric web experiences, doing user-focused research and analysing relevant data.

Designing and prototyping mobile-ready user interfaces using Adobe Photoshop or Sketch with the ability to code functional examples of these functionalities.

Other Skills and Awards

Used to working on a Agile Scrum workflow and cycle of delivery and also familiarized with version management software (Git mostly) to manage my work.

Knowledge about TDD implementation and patterns gained through professional training sessions.

General ease in learning new libraries or frameworks and expanding my skillset.

My Name Is Zillian - Silver Award in the category of Interactive Desktop Apps
Le Joy - Gold Award in the category of "Non-Commercial Website"
